Authority:

1. PURPOSE

To describe the Unit Management system procedures that shall be used for management of incarcerated individuals committed to Iowa Department of Corrections (IDOC) institutions.

2. POLICY

It is the policy of the IDOC to use a Functional Unit Management system within its institutions. Consistency is an important component of institutional operations and Unit Managers must work closely with each other and other supervisory staff to develop and maintain consistency where it is in the best interest of the institution. However, Unit Management is best implemented where a sufficient level of authority is decentralized so that Unit staff has the flexibility necessary to effectively oversee the operation of the Unit and the delivery of programs and services within the Unit.

3. DEFINITIONS – As used in this document:

- A. Housing Unit - A self-contained area that is part of a larger institution including one or more living units for incarcerated individuals and work space for Unit staff. This may also be referred to as a Management Unit in some institutions.

- B. Unit Management - A team-oriented approach to correctional management in which decision-making authority is shared by the Warden with supervisory personnel who are physically placed in close proximity to the staff and incarcerated individuals supervised. Authority, then, is further shared with a multi-disciplinary team within the Unit. Unit Management is designed to increase the frequency and quality of interaction between staff and incarcerated individuals and to ensure that program decisions are made by those who are most familiar with the incarcerated individual.
- C. Classification Team - Each Housing Unit shall be staffed by a Classification Team that includes, but is not limited to, a Unit Manager, security and treatment staff who work primarily in the Unit and who are directly responsible for the incarcerated individuals living in that Unit. Classification staff offices shall be located in the Unit where feasible, to facilitate staff and incarcerated individual accessibility to one another. Classification Team members may have responsibilities in more than one Unit.
- D. Living Unit – A subcomponent of a Housing Unit for incarcerated individual housing. Typically each Housing Unit will include several living units, each which may have a unique program component or custody designation. This may also be referred to as a Pod in some institutions.
