# Audit Findings

## Audit Narrative

*The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.*

The on-site Prison Rape Elimination Act (PREA) compliance audit of the Fort Dodge Correctional Facility, Fort Dodge, Iowa was conducted October 17 - 19, 2017, by the Nakamoto Group, Inc. certified PREA auditor Vic Killion. When the auditor arrived at the facility, an "in-briefing" meeting was held with the Warden, Deputy Warden, PREA Compliance Manager, and PREA Coordinator. The introductions and audit process were discussed during the briefing.

The standards used for this audit became effective August 20, 2012. This auditor discussed information contained in the Pre-Audit Questionnaire with the PREA Manager during the on-site visit. As part of the audit, a review of all agency and local facility policies and a tour of the facility were completed. The facility houses male offenders from the State of Iowa. A total of 40 inmates were interviewed by the auditor. Four considered high risk, three that identify as transgender, three considered LEP, three that reported previous sexual abuse at intake, and five that identify as gay or bisexual. All inmates stated they were aware of the PREA program and indicated staff were diligent in training them during the intake process. There were eight allegations of sexual abuse/harassment filed during the rating period of the past twelve months. All allegations involved inmate on inmate, six were unsubstantiated and two were unfounded.

The average length of stay at this facility is 13.2 months. The age range of the population is 18 - 84 years of age. The Fort Dodge Correctional Facility (FDCF) is one of nine correctional facilities operated under the Iowa Department of Corrections (IDOC). FDCF is a medium security facility with a double fence, razor wire configuration surrounding the facility. The current design capacity for FDCF is 1162 and the count at the first day of the on-site review was 1288.

A total of 32 staff was interviewed from all three eight-hour shifts. These included correctional officers from all shifts, 10 specialized staff, and administrative staff. The administrative staff interviewed was the Warden, Human Resources Manager, Associate Warden and PREA Coordinator. Specialized staff included the PREA Manager, Health Services Director, Psychologist, and Investigator.

The auditor interviewed a representative for the local advocacy group, the Webster County Crisis and Advocacy Services. The representative was complimentary of the relationship with the facility. A representative of the nearby Unity Point Medical Center was interviewed and indicated they have Sexual Assault Nurse Examiners (SANE) on staff that will provide examination services in the event of a sexual assault.

## Facility Characteristics

*The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special*

*housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.*

The Fort Dodge Correctional Facility (FDCF) is a medium security prison originally designed to house 762 adult male offenders in a double occupancy celled environment. Construction began in October 1996 and the facility opened in April 1998. The facility is located on 60 acres of land in southern Fort Dodge. Recognizing the on-going need for public safety even before the first offenders arrived at the facility the legislature and Governor approved an expansion for an additional 400 beds and program space. Work on this addition was completed in late 1999. In FY01, two-man cells were converted to house three offenders. Current rated capacity is 1162. The facility has seven housing units and support buildings such as administration, treatment, and a warehouse. The facility has one Special Housing Unit that holds administrative and disciplinary detention offenders.

FDCF supports offender responsibility and progress through participation in targeted evidence-based treatment opportunities. Cognitive Based programs address issues of criminal thinking, domestic abuse and substance abuse, offering offenders, opportunities to increase their skills that relate to interpersonal relationships, self-care, decision making and employment preparation.

FDCF provides educational opportunities through its partnership with Iowa Central Community College. Daily classes include HiSET (high school equivalency diploma), Literacy, ESL (English as a second language), Special Education, and Life Skills. Vocational classes vary from year to year depending on funding availability and have included Welding, Culinary Baking, Building Trades, and Supply Chain Management.

FDCF offers Apprentice Programs in the following disciplines: Cook, Electrician, Painter, Plumbing and Welding. Additionally, offenders are able to complete the National Career Readiness Certificate that assesses areas deemed critical for successful employment.

Iowa Prison Industries currently provides onsite vocational training with their Textiles Program.

## Summary of Audit Findings

*The summary should include the number of standards exceeded, number of standards met, and number of standards not met, **along with a list of each of the standards in each category.** If relevant, provide a summarized description of the corrective action plan, including deficiencies observed, recommendations made, actions taken by the agency, relevant timelines, and methods used by the auditor to reassess compliance.*

**Auditor Note:** No standard should be found to be “Not Applicable” or “NA”. A compliance determination must be made for each standard.

## **Summary of Corrective Action (if any)**

### **115.15**

During the tour, the auditor visited each housing unit. In one unit, Floyd Unit, the bathroom facilities are the community type, which has toilets and urinals. It was observed that, with the exception of two of the wall mounted urinals, the offenders were in plain view from the unit common area when using these urinals. This does not meet standard requirements.

Corrective Action: (115.15. d) The facility added dividers to provide adequate privacy. It is verified via photograph.

The facility only houses male Offenders. The facility houses transgendered offenders that identify as female. Non-emergency strip searches are conducted in accordance with the gender that the offender identifies. However, when it comes to pat searches of transgender offenders, many staff were not aware if male staff members could conduct a non-emergency pat search of these individuals. Iowa policy, HSP-704, Management of Gender Dysphoria, under Definitions, explains what gender dysphoria is and is clearly inclusive of transgendered individuals that identify as female. The Search policy, O-SC-18, states that these types of pat searches will be conducted by female staff.

Corrective action: (115.15 f) Staff were educated about the policy. The facility conducted further training and obtained acknowledgement by staff that they understand the policy. The facility provided an example of acknowledgement that the policy was understood and a statement that the training was conducted.

### **115.31**

Upon review of the training that is conducted via computer, there is no signature or electronic verification that the employee understands the training they have received.

Corrective action: (115.31 d) The program has been updated to reflect that the PREA training is understood. The program electronically verifies each staff member that took the training by selecting a verification button that records the completion of the course. Verification of compliance was provided with an example of a screen print showing the acknowledgement.

### **115.32**

A review of the training program revealed the training for contractors and volunteers cover all aspects of the standard with one exception. The majority of the training is conducted via a computer course. There were a small number of individuals that had in-person training. Review of the acknowledgement, in these in-person training cases, revealed the contractor or volunteer signs that they are expected to follow the policy, but falls short of saying they understand the training. In the

case of the electronic training, there is no indication of signature or electronic acknowledgement that they understand the training.

Corrective action:(115.32 c) The program has been updated to reflect that the PREA training is understood. The program electronically verifies each volunteer/contractor that took the training by selecting a verification button that records the completion of the course. Verification of compliance was provided with an example of a screen print showing the acknowledgement.

Statewide policy, PREA-01 and local policy FDCF-01, establishes the requirement of this standard by establishing a zero-tolerance for all forms of sexual abuse and harassment. A review of training records and staff interviews confirmed that staff who have regular or frequent contact with offenders receive PREA related training during new employee training and annually on e-learning programs. The PREA Coordinator was interviewed and advised that she has sufficient time and authority to coordinate efforts to comply with PREA standards. Compliance to this standard was determined through staff interviews and policy review. All written documents are available in English and Spanish. - Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

## Instructions for Overall Compliance Determination Narrative

*The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Policy AD-GA-13 and FDCF-01 meets the requirements of this standard. The policy requires any new contract or contract renewal must provide for IDOC contract monitoring to ensure the entity is complying with the PREA standards. Additionally, review of Iowa form IS-CL-09 F-1, which is a standard contract for interstate corrections compact agreement, clearly reflects the requirements as addressed in this standard. Policy AD-PR-03, Review of Staffing Requirements and IO-SC-01, Management of the Security Program, addresses the requirements of this standard. Compliance with PREA and other safety and security issues are always a primary focus when the administration considers and reviews their staffing plan. The plan is reviewed at least annually in consultation with the PREA coordinator. There have been no instances in the previous year where the staffing plan was not complied with. Since last audit, the facility has upgraded numerous cameras throughout the institution. Cameras have been added to the Music Room; IT offender office; Chapel, MPR; Visiting Room; and four housing units facing location in the yard which has previously been difficult observation points. The facility has expanded their PDA scanning system, placing additional scan points throughout the institution to ensure rounds are being completed in those areas identified as needing additional observation and providing documentation of

the rounds being performed. PREA posters were observed by the auditor in numerous places throughout the facility. The audit included an examination of all video monitoring systems, offender's access to telephones, documentation (staffing rosters) and staff interviews.

### Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

### Instructions for Overall Compliance Determination Narrative

*The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Policy O-SC-18, Searches, addresses this standard. Cross-gender strip and body cavity searches are prohibited, except in emergency situations. Any potential strip searches would be completed by staff of the same gender as the resident and documented. Inmates, correctional officers, and administrative staff stated offenders are allowed to shower, dress and use the toilet privately without being viewed by opposite gender. Offenders and staff reported that staff of the opposite gender utilizes a buzzer/ light system to identify staff of the opposite gender to indicate their presence. In the late hours, a verbal announcement is made. Staff were aware of the policy prohibiting the search of trans-gender or intersex offenders to determine their genital status.

During the tour, the auditor visited each housing unit. In one unit, Floyd Unit, the bathroom facilities are the community type, which has toilets and urinals. It was observed that, with the exception of two of the wall mounted urinals, the offenders were in plain view from the unit common area when using these urinals. This does not meet standard requirements.

Corrective Action: (115.15. d) The facility added dividers to provide adequate privacy. It is verified via photograph.

The facility only houses male offenders. The facility houses transgendered offenders that identify as female. Non-emergency strip searches are conducted in accordance with the gender that the offender identifies. However, when it comes to pat searches of transgender offenders, many staff were not aware if male staff members were allowed to conduct a non-emergency pat search of these individuals. Iowa policy, HSP-704, Management of Gender Dysphoria, under Definitions, explains what gender dysphoria is and is clearly inclusive of transgendered individuals that identify as female. The Search policy, O-SC-18, states that these types of pat searches will be conducted by female staff.

Policy IS-RO-01, Offender Admission Procedures, addresses this standard. All offenders are assessed at intake using the Iowa Department of Corrections Sexual Violence Propensity (SVP) Intake Screening tool within 24 hours of admission and they are given a SVP code. This is scanned into the offender's electronic record ICON. Additionally, the initial medical screening involves the use of the Modified MINI (Modified Mini Screen). This instrument offers offenders who have ever previously been victims or perpetrators of sexual abuse a follow-up meeting with a mental health practitioner. The Psychology department then picks up the MINI daily and will schedule any requests for follow-up within 14 days. If there is a potential for sexual perpetration or victimization indicated during this process, the individual is placed in single cell status until further assessment. Further assessment is completed by a Counselor or Psychologist within three work days and before transfer to another facility. Within 30 days, a reassessment will be conducted during classification considering any further information obtained. This was verified through review of policy, screening instruments, and interviews with staff.
