Background
The Prison Rape Elimination Act (PREA) was passed unanimously by Congress and signed into law by President George W. Bush in 2003. In 2012, the Department of Justice (DOJ) published final standards to govern implementation of the purposes of PREA which are to enable corrections systems to better detect, prevent, reduce, and punish for sexual violence committed against offenders who are housed in this nation’s corrections and confinement systems. This Annual PREA Report is prepared and published pursuant to PREA Standard 115.88.

This year the U.S Department of Justice requested the Governor’s Office to provide a copy of all final audit reports completed to date from (August 20, 2017 through August 19, 2019) for confinement facilities under operational control of the executive branch of a state. These facilities include all nine institutions and the State Training School for Boys in Eldora, Iowa. All certification requirements and supplemental documentation was forwarded to DOJ by October 15, 2019.

Annual reports to DOJ/BJS
The Iowa Department of Corrections (IDOC) has reported PREA investigation data to DOJ, Bureau of Justice Statistics (BJS), for the Iowa Corrections System from 2006 through 2019.

Governor's Certification
Upon completion of audit year three of the second audit cycle, all of the institutions under operational control of the executive branch, Office of the Governor, has met the requirements of all PREA standards and is fully certified.

11. PREA SEXUAL VIOLENCE INVESTIGATION CASE FINDINGS.

Upon completion, investigators conclude an investigation with one of the following three official findings for the allegation:

- **SUBSTANTIATED**: The investigation found a preponderance of evidence that shows the allegation to be true.

- **UNSUBSTANTIATED**: The evidence is insufficient to prove the allegation true or false. A preponderance of credible evidence could not be obtained. The evidence is inconclusive and cannot show whether the allegation did, or did not happen.

- **UNFOUNDED**: A preponderance of evidence indicates the allegation to be untrue. Does not mean the investigation failed to prove the misconduct happened.

- **OTHER**: Not an official finding. “Other” has been used in the past to conclude rare cases with special circumstances. No cases with a finding of “Other” were reported in 2019.

Data includes all Iowa Prisons and Community Based Corrections (CBCs).
In 2019 there were 193 Sexual Violence investigations in Iowa’s prisons, 35 (18%) of which the allegations were found to be Substantiated by investigators.

In 2019, there were 25 Sexual Violence investigations in Iowa’s CBCs, 11 (44%) of which the allegations were found to be Substantiated by investigators.
Summary of Achievements
As a result of the data gathered and reported during Investigations, PREA Audits and Incident Reviews, the IDOC prisons and community based corrections continue to utilize information provided to educate all staff, clients and incarcerated individuals in the area of PREA and maintaining a zero tolerance culture in all of Iowa’s institutions and residential facilities. SVP (Sexual Violence Propensity)  The department continues to be highly committed to providing quality services and assessments to assist IDOC professionals in making informed decisions on how to place offenders/clients in work, bed, education and program assignments via individualized planning and determinations based on their sexual violence propensity in order to ensure the safety of each offender/client in Iowa’s correctional facilities.

SVS History and Methodology  The Iowa Dept. Of Corrections continues ongoing collaboration with the Justice Dept. by collecting and reporting SVS data annually. The Bureau of Justice Statistics (BJS) began the Survey of Sexual Violence (renamed the Survey of Sexual Victimization) in 2004. It is an annual collection mandated by the Prison Rape Elimination Act of 2003 (PREA) to measure the incidence of prison rape. The survey is based on official administrative records of correctional systems and facilities, and covers all federal prisons, state prisons, and facilities operated by the U.S. military and Immigration and Customs Enforcement, and a representative sample of local jails, jails in Indian country, and privately operated jails and prisons. The U.S. Census Bureau currently serves as the data collection agent.

- **Sampling:** The sample designs for BJS's 2012-2018 Survey of Sexual Victimization (SSV, formerly Survey of Sexual Violence) varied for each type of facility covered by the Prison Rape Elimination Act of 2003.

- **Federal and state prisons:** For each year, the survey included the Federal Bureau of Prisons and all 50 state adult prison systems. Prison administrators reported on allegations and substantiated incidents of sexual victimization that occurred within publicly operated adult prison facilities only, and excluded allegations and incidents involving federal or state inmates in other facilities, such as privately operated prisons or jails.

Data Assessment

After review of investigation data, incident reports, and corrective actions taken by the prisons, and residential facilities the Director, Deputy Director of Operations and Inspector General’s Office continue to monitor IDOC’s progress and to manage current processes and procedures for detecting, preventing, reducing, and holding accountable all perpetrators of sexual violence in Iowa prisons. The IDOC continues to implement the requirements of the PREA standards and make changes that are determined to be necessary through on-going review.
